

### **RLW 107J (RS700244)**

ISSUE: Was entered in DB as a 1969 bull that was 50% Romagnola, 50% Unknown.

CORRECTION: 2007 Bull who is 50% RN: 50% Angus

Impact: Currently, 50 calves are registered as sired by 107J. These and any of their descendants will need corrected.

### **RLW DRAG BUNT F276 (RS 700202)**

Issues: 1) Breed composition was calculated wrong based on the pedigree that was in the database at the time 2) upon receipt of the original documents on his dam from Dawn's Promise it was discovered that there was an error in the maternal side of the pedigree.

The dam of F276 is a cow called PAXTON (reg number B276); her granddam (MARS JOYCE 318) was incorrectly entered into the RRCA database as 100% Romagnola (RN001324), when in fact, she was a purebred Angus cow (AAA registration number 12028778).

Correct Information: PAXTON is 75% RN: 25% Angus, not 50% RN as was entered in the database.

Impact: The popular sire **RLW Drag Bunt F276** is out of the Paxton cow. Currently, there are 67 progeny registered to F276. These and any of their descendants will need corrected.

Ancestors Corrected:

Paxton's Granddam (Mars Joyce 318) – 100% Angus. Reg number 12028778

Paxton's Dam (A276 cow with reg number R00148) – 50% RN: 50% AN

Paxton (B276) – 75% RN: 25% AN

Drag Bunt – 62.5% AN: 37.5% RN

### **Squeeze Play – RomAngus bull (RS700106)**

ISSUE: Breed composition was calculated wrong.

CORRECTION: Squeeze Play is by a 100% Romagnola Bull (RN001236) and out of a 100% Angus cow. Therefore, he is 50% RN: 50% Angus; not 75% AN.

IMPACT: Currently, 25 calves are registered to him. These and any descendants will need corrected.
